**Working together to improve development of health informatics in Africa.**

**Next event:  
 GNU Health – Implementations use case in Africa.  
 10 March 2021**

## Meet Your Host:

**Prof Graham Wright**  
 SAHIA – EWG Chairperson  
 HELINA – EWG Member

Professor Graham Wright is a chartered information systems practitioner with a clinical and managerial background.

He moved to South Africa to take up the Chair of Health Sciences Research at Walter Sisulu University in 2009 and Adjunct Professor in Health Informatics at Fort University in 2014.

He is a founding member of the International Academy of Health Sciences Informatics and a Fellow of the British Computer Society.

## Meet Your Presenter:

**Dr Luis Falcon**  
 President of GNUSolidario  
 Author of MyGNUHealth

Dr. med. Luis Falcon is president of GNUSolidario, General Practitioner, computer scientist, and free software activist.

Luis' mission, both with GNU Health and the MyGNUHealth application, is to help us and the healthcare system improve our well-being.

## *GNU Health: MyGNUHealth*

MyGNUHealth is an application that gives us control over our own health data, keeping a record of our blood pressure, heart rate and so on, thus allowing us to monitor the state of our vitals at all moments. With a focus on privacy, the application is Libre software and provides a way of integrating with the larger ecosystem of public healthcare, while ensuring our data is not being leaked to third parties. The application offers different types of functionalities, not only focusing on the physiological aspects of health tracking, but also including trackers for signs of stress of great importance when monitoring our psychological health.
